# MICHAEL A. PIKOS, DDS

## Our CEO & Founder

Dr. Michael A. Pikos is originally from Campbell, Ohio. He attended The Ohio State University where he graduated Summa Cum Laude and Phi Beta Kappa. He also graduated with honors from The Ohio State University College of Dentistry. Dr. Pikos completed an internship at Miami Valley Hospital and residency training in Oral & Maxillofacial Surgery at the University of Pittsburgh, Montefiore Hospital.

He is a Diplomate of the American Board of Oral and Maxillofacial Surgery, Diplomate of the American Board of Oral Implantology/Implant Dentistry, Diplomate of the International Congress of Oral Implantologists and a Fellow of the American College of Dentists. Dr. Pikos is the recipient of the 2006 Aaron Gershkoff Memorial Award from the American Academy of Implant Dentistry and the 2015 Saul Schluger Memorial Award for Top Educator. He is also the first recipient of the Carl E. Misch Advanced Dental Implant Studies Education Award (2017).

He is an Adjunct Assistant Professor, Department of Oral & Maxillofacial Surgery at The Ohio State University College of Dentistry and Nova Southeastern University College of Dental Medicine. He is also a Courtesy Clinical Associate Professor, Department of Periodontology and Department of Prosthodontics at the University of Florida College of Dentistry, Adjunct Professor, Department of Oral & Maxillofacial Surgery, Aristotle University of Thessaloniki, Greece, School of Dentistry, and Adjunct Associate Professor, Department of Periodontology, University of Alabama at Birmingham.

Dr. Pikos is on the Editorial Board of the following journals: Implant Dentistry, Inside Dentistry, the Journal of Esthetic and Restorative Dentistry and the Journal of Implant and Advanced Clinical Dentistry.

As an OMS, he is one of the first clinicians to recognize the relevance of Cone Beam CT and interactive CT technology for comprehensive diagnosis and treatment planning along with its implementation for implant based oral rehabilitation. As a result, Dr. Pikos has made this high technology a cornerstone of both his private practice and Institute.

Dr. Pikos has extensive experience in implant surgery and hard and soft tissue procedures. He also emphasizes interactive CT technology along with foundational principles of prosthetics and biomechanics that dictate the ultimate success of comprehensive implant rehabilitation.

Dr. Pikos is the author of the book *Bone Augmentation in Implant Dentistry* published by Quintessence Publishing. He has lectured extensively on dental implants in North and South America, Europe, Asia, and the Middle East.

Dr. Pikos is an active member and frequent lecturer for the American Association of Oral and Maxillofacial Surgeons, the American Academy of Periodontics, the Academy of Osseointegration, the American Academy of Implant Dentistry and the International Congress of Oral Implantologists.

Dr. Pikos is founder and CEO of the Pikos Institute. Since 1990 he has been teaching advanced bone and soft tissue grafting courses along with full arch immediate reconstruction courses with alumni that now number more than 5000 from all 50 states and 43 countries.

Dr. Pikos maintains a private practice which is limited exclusively to implant surgery in Trinity, Florida.

## PIKOS INSTITUTE PHILOSOPHY

### **More than 36 years of "what works, what doesn't and why"**

The Pikos Institute curriculum is derived from thousands of cases performed, decades of meticulous case documentation and continuous study and deployment of the latest technologies, techniques, materials and innovations. This profusion of encyclopedic clinical percipience is then broken down in to easily understood, comprehensive, step by step instruction for predictable, repeatable performance of several essential surgical protocols that will meaningfully enhance your clinical proficiency and confidence and prove its value to your practice business model for the rest of your career.

The Pikos Institute Philosophy manifests the natural restoration of dental esthetics, function and comfort for optimized dental implant rehabilitation. It applies evidence-based rationale and experience proven implementation of the latest diagnostic, tissue regenerative and restorative protocols. In addition, it embodies a comprehensive integration of precision imaging technology and science through virtual reality case planning for predictable and long-term implant case success.

## CONTEMPORARY SOFT TISSUE GRAFTING FOR IMPLANT RECONSTRUCTION

**Learn Proven Techniques and the Latest Innovations for Successful Soft Tissue Grafting!**

Gingival Grafts | Subepithelial Connective Tissue Grafts | Pedicle Tunnel Connective Tissue Grafts™ | Vestibuloplasty | Acellular Dermis Matrix (ADM) Allografts | Esthetic Zone Reconstruction | Growth Factor Technology

20 hours lecture AGD Subject code: 490, 3 hours participation AGD Subject code: 490

**Master** the practical application of the entire spectrum of **soft tissue grafting** protocols and concepts. **Learn from decades of meticulous case documentation** synergized with the most modern advancements in soft tissue techniques, materials and regenerative principles. By taking this course, you will **facilitate confidence and proficiency** in performing successful and predictable implant soft tissue surgery and management concepts **that will continue for the rest of your career.**

**Also Featured: Hands-on workshop | Live surgical demonstration cases**

## Course Objectives:

*Upon completion of this course, you will be able to:*

1. Become proficient with implant-based soft tissue management.
2. Understand "the why" not just "the how to" of soft tissue grafting.
3. Confidently perform the most utilized soft tissue grafting procedures in implant dentistry.
4. Improve your profitability with implant based soft tissue grafting procedures.
5. Increase predictability and long-term stability of your bone graft cases.
6. Recognize, manage and prevent complications associated with soft tissue grafting.

## Course Topics:

- Pikos Institute Philosophy of oral implant rehabilitation for soft tissue therapy - "Think Outside the Bone™".
- Key principles for evidence based predictable soft tissue grafting.
- Site specific soft tissue anatomy and wound healing of peri-implant tissues.
- Soft tissue manipulation and incision flap design for predictable bone grafting.
- Optimal sequencing of soft tissue procedures for successful implant surgery and bone grafting.
- Guidelines, indications and surgical protocols for gingival grafts, subepithelial connective tissue grafts, and acellular dermis matrix allografts.
- Development of optimal peri-implant soft tissue architecture.
- Eight most commonly used suturing techniques for implant surgical reconstruction.
- Soft tissue grafting protocols for esthetic zone reconstruction.
- Predictable protocols for extraction site management with and without simultaneous implant placement.
- Growth factor technology (L-PRF, PRGF, PDGF) in conjunction with soft tissue grafting protocols.
- Risk management issues/ informed consent for advanced soft tissue grafting.
- Recognition, management, and prevention of complications associated with soft tissue grafting.

# SINUS GRAFTING FOR IMPLANT RECONSTRUCTION

Learn Practice-changing Protocols, Concepts, Materials, Tips and More!

Lateral Wall Approach | Crestal Approach | Sinus Membrane Perforation Repair | Prevent & Manage Complications | CBCT Evaluation | Delayed & Simultaneous Implant Placement | Bioactive Modifiers

20 hours lecture AGD Subject code: 690, 3 hours participation AGD Subject code: 690

**Learn** and perform the best practices for the **best predictable outcomes** and never abort a sinus case again due to a perforated sinus membrane, with Dr. Michael A. Pikos' proven technique for **immediate sinus membrane repair**. Take home the best of **"what works, what doesn't and why"** derived from Dr. Pikos' more than **1400 sinus grafts** performed over 30+ years. By taking this course you will **acquire enduring skills** to confidently provide perhaps the most frequently required treatment for implant site development.

**Also Featured:** Hands-on workshop | Live surgical demonstration cases

## Course Objectives:

*Upon completion of this course, you will be able to:*

1. Practice the Pikos Institute Philosophy for sinus bone grafting as they become confident with the clinical and sequential CBCT evaluation protocol.
2. Understand the indications, guidelines and surgical protocols for sinus bone grafting: lateral and crestal approach.
3. Perform sinus bone grafting with delayed and simultaneous implant placement.
4. Understand the anatomy, biology and wound healing of sinus bone grafting.
5. Recognize, manage and prevent intraoperative and postoperative complications associated with sinus bone grafting.

## Course Topics:

- Pikos Institute Philosophy of sinus bone grafting.
- Sequential 3D digital diagnostic evaluation protocol for predictable sinus bone grafting.
- 7 key principles and algorithms for science based, predictable sinus bone grafting.
- Biology and wound healing of sinus bone grafting.
- Comparison of autografts, allografts, xenografts and alloplasts as graft materials for sinus bone grafting.
- Indications and step-by-step surgical protocol for sinus bone grafting – lateral and crestal approach.
- Osseodensification with crestal sinus grafting.
- Comprehensive long-term case presentations (10-20+ years).
- Growth factor technology (L-PRF, rhPDGF, rhBMP-2) in conjunction with sinus bone grafting.
- Risk management issues related to sinus bone grafting.
- Sinus bone grafting in the presence of thickened sinus membranes, polyps and mucous retention cysts.
- Predictable **repair** of **large** and **complete** sinus membrane **perforations**.
- Comprehensive recognition, management, and treatment of intraoperative, early and late postoperative complications.

31 CE Hrs

## ALVEOLAR RIDGE STRATEGIES: SINGLE TOOTH TO FULL ARCH RECONSTRUCTION

**Learn Essential, Applicable Techniques for Predictable Bone Augmentation!**

GBR | Block Grafting | Ridge Expansion | Titanium Mesh | Use of Ti PTFE Membrane | Graft Site Evaluation | Use of rhBMP-2 / Bioactive Modifiers | Sequential 3D Digital Diagnostic Protocol | Complication Management

27 hours lecture AGD Subject code: 690, 4 hours participation AGD Subject code: 690

**Understand** how to create routine success at even advanced horizontal and vertical bone augmentation. **Learn the “why”** behind many procedural steps that promote the best outcomes, **minimize complications** and anticipate integration with the patient's entire treatment plan. With the vital and practical instruction in this course, you can dramatically **expand the limits** of your **patient acceptance** and **professional growth** with confident proficiency in several modes of implant site development and implant reconstruction.

**Also Featured: Hands-on workshop | Live surgical demonstration cases**

## Course Objectives:

*Upon completion of this course, you will be able to:*

1. Deploy the practical application of advanced hard tissue augmentation, incision design and suturing techniques for predictable implant rehabilitation.
2. Understand the indications, guidelines, and surgical protocols for advanced bone grafting procedures.
3. Perform implant related advanced hard tissue augmentation procedures.
4. Understand the anatomy, biology and wound healing of advanced bone grafting.
5. Recognize, manage and prevent complications associated with advanced bone grafting.

## Course Topics:

- Pikos Institute Philosophy of oral implant rehabilitation for hard tissue augmentation.
- Sequential 3D digital diagnostic protocol to evaluate hard tissue donor sites and post graft recipient sites.
- Key principles and algorithms for science based, predictable advanced bone grafting.
- Predictable horizontal and vertical alveolar ridge augmentation.
- Site specific hard tissue architecture and wound healing related to advanced bone grafting and case success.
- Clinically significant anatomic variables for autogenous, allogeneic and xenograft bone grafting.
- Evidence based data from 20-year retrospective and prospective mandibular block graft studies.
- Biomechanical principles consistent with reverse tissue engineering of bone grafts.
- Indications and surgical protocols for extraction site management, ridge expansion, GBR, allograft particulate grafting with resorbable barriers and autogenous block grafting.
- Growth factor technology (PRGF, PDGF, BMP-2) in conjunction with bone grafting protocols.
- Risk Management issues / informed consent for advanced bone grafting.
- Recognition, management and prevention of complications associated with bone grafting.

## TEAM APPROACH- FULLY GUIDED FULL ARCH IMMEDIATE IMPLANT RECONSTRUCTION: PROSTHETIC AND SURGICAL PROTOCOL

**Perform the Most Profoundly Transformative Protocols in Implant Dentistry!**

Fully Guided Full Arch | Digitally Planned Restoration | Virtual Treatment Planning | Conversion Protocol Comparison | Integrated Restorative, Surgical and Laboratory Disciplines | All-on-XYZ™ Diagnostics

20 hours lecture AGD Subject code: 690, 3 hours participation AGD Subject code: 690

**Give your team the tremendous advantage** of being able to offer patients the **highest precision** and **predictability** in full arch surgical, restorative and diagnostic modalities. From this full-spectrum, multi-specialty course, you or **your team will acquire the skills** necessary to successfully **perform the complete protocol** for digitally planned, fully guided **full arch restoration** involving nSequence® Guided Prosthetics™.

**Also Featured: Hands-on workshop | Live surgical demonstration cases**

## Course Objectives:

*Upon completion of this course, you will be able to:*

1. Become comfortable diagnosing and virtual treatment planning full arch immediate implant reconstruction cases.
2. Learn the appropriate parameters for All-on-XYZ™ diagnostics.
3. Learn the unique nSequence® Guided Prosthetics™, digitally planned, fully guided surgical, restorative, and laboratory protocol for full arch immediate implant reconstruction and immediate function protocol.
4. Understand the indications of a digitally planned, fully guided surgical, restorative and laboratory approach for immediate full arch implant reconstruction.
5. Understand the advantages of the Immediate function protocol that involves the nSequence® Guided Prosthetics™ approach to digitally planned guided surgery protocol vs. the conventional conversion denture surgery protocol for full arch immediate implant reconstruction.

## Course Topics:

- Learn the protocol for a unique, digitally planned, fully guided surgical, restorative, and laboratory approach for immediate full arch implant reconstruction (nSequence® Guided Prosthetics™ protocol).
- Compare the indications and advantages of a unique digital based, fully guided, interdisciplinary protocol (nSequence® Guided Prosthetic™ protocol) with the conversion denture protocol for full arch immediate implant reconstruction.
- Learn the advantages of providing the nSequence® Guided prosthetics™ protocol digital workflow in comparison to the workflow for both provisional and final prosthesis fabrication.
- Understand the limitations and complications of the nSequence® Guided Prosthetics™ protocol in addition to the conversion denture protocol.

## FULL SPECTRUM ZYGOMATIC IMPLANT THERAPY DEMYSTIFIED

**Learn Proven, Evidence Based Protocols for Predictable Zygomatic Implant Therapy!**

*Surgical Decision Tree | Hands-on Cadaver Lab and Model Surgery Workshop | 3D Digital Treatment Planning | Diagnostic and Clinical Assessment Skills | Surgical Guided and Brain Guided Approaches | Photogrammetry | Restorative Workflow | Complications-Prevention/Management*

16 hours lecture AGD Subject code: 490, 8 hours participation AGD Subject code: 490

This unique comprehensive lecture discussion, **cadaver** and hands-on model surgery-based course will cover the use of **zygomatic implants** for treatment of the severely atrophic maxilla. It will include **single zygomatic use, hybrid zygoma** and **quad zygoma** case types.

A prophylactic **evidence-based approach to zygomatic implant placement** will be featured. **Conservative osteotomy preparation** with a focus on **prosthetically guided implant placement**, along with both soft and hard tissue considerations will be discussed.

A Step-by-Step Guide  
to Predictable Alveolar Ridge and Sinus Grafting

# BONE AUGMENTATION IN IMPLANT DENTISTRY

**Video 1: Pedicle Subepithelial Connective Tissue Graft: Flapless Extraction Maxillary Central Incisor with Socket Graft - \$295**

Features the use of a unique pedicle tunnel connective tissue graft technique in conjunction with flapless extraction of a compromised maxillary central incisor, and simultaneous socket grafting with a mineralized allograft. Detailed step-by-step procurement and placement of a pedicle connective tissue graft is discussed in detail. Recipient and donor site closure will also be covered.

**Video 2: Resorbable Mesh/rhBMP-2 Bone Graft for Maxillary Anterior Horizontal Deficiency - \$295**

Features the use of rhBMP-2/ACS with resorbable mesh (SonicWeld) to correct a horizontal deficiency of the existing atrophic maxillary central incisor sites. Incision design, flap reflection and release, site preparation, along with step-by-step description of the application of rhBMP-2 with SonicWeld mesh will be covered in detail. Soft tissue closure with specific suturing techniques will also be shown.

**Video 3: rhBMP-2/Mineralized Allograft/PTFE Membrane Titanium Reinforced with Pro-fix screw fixation for Extraction #30 - \$295**

Patient presented with mandibular right first molar in a failing mode that included peri apical pathology and buccal plate loss. Video details surgical tooth extraction along with site preparation and the use of rhBMP-2 and mineralized allograft. It also features the use of a titanium reinforced PTFE membrane with appropriate screw fixation. Finally, it includes detailed soft tissue manipulation and suturing.

**Video 4: Ridge Expansion, Anterior Maxilla and Implant Placement with Veneer Bone Graft (rh-PDGF) - \$295**

Covers a unique step by step surgical protocol of anterior maxillary ridge expansion and simultaneous implant placement. It will include buccal veneer grafting with mineralized allograft and rhPDGF and use of a collagen membrane with fixation. It also features soft tissue flap manipulation and suturing.

**Video 5: Sinus Augmentation with rhBMP-2 and Simultaneous Nonsubmerged Implant Placement - \$295**

Features the use of rhBMP-2 and mineralized allograft for grafting the partially pneumatized left maxillary sinus along with simultaneous placement of a large diameter implant in a non submerged mode into the maxillary left second bicuspid site. The step by step surgical protocol will focus on incision design, lateral window osteotomy, membrane elevation and repair, the use of rhBMP-2 for bone grafts, and simultaneous non-submerged implant placement.

**Video 6: Extraction #8 with Socket Graft, PTCTG™ (Pedicle Tunnel Connective Tissue Graft™) and PRF - \$295**

This video will feature flapless extraction of tooth #8 (maxillary right central incisor) with socket graft and simultaneous placement of a Pedicle Tunnel Connective Tissue Graft (PTCTG™). A detailed step by step description will cover the flapless extraction, use of mineralized allograft (MinerOss®), along with both the harvesting of the Pedicle Tunnel Connective Tissue Graft and placement of this graft in to the facial pouch created at the socket recipient site. Donor site closure will also be featured with use of L-PRF.

**Video 7: Mandibular Vestibuloplasty with Alloderm® and PRF; Simultaneous, Stage Two Implant Surgery - \$295**

This video will include a step by step protocol of an edentulous mandible vestibuloplasty in preparation for an implant bar supported overdenture. It will feature the use of acellular dermis matrix (Alloderm), detailed recipient site preparation, and the role of radio-surgery and L-PRF.

**Video 8: Titanium Mesh / rhBMP-2 Bone Graft for Mandibular Anterior Horizontal Deficiency - \$295**

This video will feature the use of rhBMP-2/ACS with titanium mesh to augment a horizontal alveolar ridge deficiency associated with two remaining mandibular incisors. Incision design, flap reflection and release, site preparation, along with step by step description of the application of rhBMP-2 and partial allograft / xenograft will be covered in detail. Soft tissue closure with specific suture techniques will also be shown.

**Video 9: Titanium Mesh Removal and Implant Placement: Status Post Horizontal Augmentation of the Anterior Mandible - \$295**

This video will feature a step by step protocol for titanium mesh removal with implant placement of the anterior mandible. A previous video showcased the use of titanium mesh with rhBMP-2 and particulate allograft/xenograft for horizontal alveolar ridge augmentation of the mandibular incisor region. A sequential approach will be described for flap management, titanium mesh retrieval, implant placement and soft tissue closure.

**Video 10: Sinus Graft with Immediate Implant Placement - \$295**

This video will feature a right sinus augmentation with simultaneous placement of two implants in a nonsubmerged mode. Step by step protocols will include incision design, flap management, sinus bone grafting with particulate allograft, xenograft and L-PRF, along with simultaneous placement of two implants nonsubmerged.

**Video 11: Fully Guided Full Arch Immediate Implant Reconstruction Two Arch Case - \$345**

This video will feature a two jaw fully guided full arch immediate implant reconstruction case using the nSequence® prosthetic plan. It will focus on a comprehensive, step by step surgical protocol and includes detailed coverage from extractions to placement of the provisional prostheses with 5-year follow-up. There are many pearls to be gleaned from this video.

## 2022 Course Schedule

### Pikos Institute Courses:

#### Soft Tissue Grafting for Implant Reconstruction

☐ Aug. 18 - 20, 2022 | \$4900 US | 23 CE Hrs

#### Sinus Grafting for Implant Reconstruction

☐ Oct. 20 - 22, 2022 | \$5500 US | 23 CE Hrs

#### Alveolar Ridge Strategies:

##### Single Tooth to Full Arch Reconstruction

☐ Apr. 6 - 9, 2022 | \$6800 US | 31 CE Hrs  
☐ Sept. 14 - 17, 2022 | \$7500 US | 31 CE Hrs

#### Team Approach: Fully Guided Full Arch Immediate Implant Reconstruction Prosthetic and Surgical Protocol

☐ May 19 - 21, 2022 | \$5500 US | 23 CE Hrs  
☐ Dec. 8 - 10, 2022 | \$5900 US | 23 CE Hrs

#### Full Spectrum Zygomatic Implant Therapy Demystified

☐ July 27 - 30, 2022 | \$9500 US | 24 CE Hrs  
☐ Nov. 9 - 12, 2022 | \$9500 US | 24 CE Hrs  
Cancellations for this course must be made 60 days prior to the course date to receive a refund, otherwise a \$2,500 deposit will be forfeited.

### Pikos Symposium: 2022 (Ritz-Carlton, Orlando)

#### Hard & Soft Tissue Grafting for Optimal Implant Reconstruction

☐ Main Symposium October 6 - 8, 2022 | \$2995 US | 24 CE Hrs

#### Optional Hands-on Workshops Held on Oct. 5, 2022

- ☐ 8am - 12pm - Dr. Matthew Flen: | \$995 US | 4 CE Hrs  
Improving the Predictability of Guided Bone Regeneration with Resorbable Materials
- ☐ 8am - 12pm - Dr. Giulio Raspérini: | \$995 US | 4 CE Hrs  
Plastic Periodontal Regenerative Surgery, Nowadays Techniques
- ☐ 1pm - 5pm - Dr. Alberto Monje: | \$995 US | 4 CE Hrs  
Surgical Therapy of Peri-implantitis: From Reconstructive Therapy to Soft Tissue Conditioning
- ☐ 1pm - 5pm - Dr. Roberto Rossi: | \$995 US | 4 CE Hrs  
The Cortical Lamina Technique: Present and Future of 3D Ridge Augmentation

Cancellations must be made at least 30 days prior to the course to receive a refund; otherwise a \$1,000 deposit will be forfeited.

A \$100 administrative fee will be charged for each change made within 30 days of the course.

Pikos Institute reserves the right to refuse registration and to cancel or modify the conference without prior notice.

Customer Travel Costs: Pikos Institute is not responsible for reimbursing prepaid (including non-refundable) customer travel costs. It is recommended that customers who elect to incur travel costs for a training course, schedule and purchase airfare and hotel accommodations with this in mind.

## TESTIMONIALS

"I have attended Pikos courses and symposiums for the last 25 years and always walk away impressed. The Guided Surgery course was no exception. The knowledge and experience delivered through this course is invaluable to anyone who wants to provide state of the art immediate load cases."

**Dr. Nelson Eddy, Perio - Rockhill, SC**

"Best CE I have attended in the past 23 years!"

**Dr. Bryan Neuwirth, OMS - Conover, NC**

"I definitely got more out of this course for GBR than 2 years fellowship at Columbia University Implant Department!"

**Dr. Neda Azadivatan, Perio - Red Hook, NY**

"I always expect to get a pearl or two from CE, but this was exceptional. I got a big PEARL – Are you kidding me – I got a whole oyster! Great one-of-a-kind course."

**Dr. Douglas Harshberger, GP - Independence, MO**

"Being a senior OMS faculty at an academy medical center, we are frequently doing reconstruction and bone graft. Having been to numerous surgically centered CE courses, I have found this course to have been the most surgically and clinically beneficial course of all. The many pearls of knowledge will have great benefit for all procedures from the simple "doghouse" rehabilitation to the large "castles." I will be a future participant for other Pikos Institute courses."

**Dr. Butch Ferguson, OMS - Martinez, GA**

"High quality education – immediately applicable!"

**Dr. George Chao, GP - Okotoks, Canada**

"These courses (bone and soft tissue so far) are providing the sound evidence/science for what we put into clinical practice. The material is presented in a step-by-step fashion so you can begin applying the technique immediately when you return to your practice."

**Dr. Andrea McPhillips, OMS - Stephenville, TX**

"This is one of the most fantastic courses I have taken. The pace and content are practical and extremely well conveyed and demonstrated... In a day and age where the complexity of dental technology and dentistry as a whole, continues to outpace our abilities to adapt, Dr. Pikos and his incredible team courageously forge forward into the unknown – graciously and humbly expanding our abilities to provide state-of-the art care to our patients and communities in a display of surgical, restorative and didactic brilliance."

**Dr. Jason Stoner, Perio - Dublin, OH**

"This seminar is one of the best seminars I have attended. Very precise, concise and nicely presented. A lot of very good practical information."

**Dr. David Lee, GP - Maryland**

"Not only was I blown away by the amount of information and content but we were treated with such respect and care that it made you feel part of a family. Great course, great instructor, wonderful weekend."

**Dr. Jeffrey Fox, GP - New York**

"One of the best courses I have ever attended. Dr. Pikos has improved his course since the last time I took it in the 1990s. It was excellent in the 1990s but it is even better now. I thank him for his honesty, integrity and time to improve our practices."

**Dr. Gary Kanemura, Perio - California**

"For me the best part was seeing the pace of the surgical procedures. Makes me realize that procedures can be done more efficiently than I can now do them. This course should really help take my practice to the next level and reduce stress on me and my staff."

**Dr. Thomas Boland, OMS - St. Petersburg, FL**

"This course is a perfect blend of scientific principles, art, and technique dovetailed with state of the art axial imaging to provide predictable results for both the patient and the surgeon."

**Dr. Brant Goyne, OMS - Shreveport, LA**

"This is absolutely the most organized course I have ever attended. The amount of information disseminated was equal to a 5 day course!"

**Dr. John Carson, Perio - Fair Oaks, CA**

"This course is a must for anyone who does these procedures. Having gone through many other bone grafting courses, I can say that this course is the Ritz Carlton of advanced bone grafting courses."

**Dr. Shervin Erfani, GP - Encinitas, CA**

"This was an excellent course for someone who wants to take their implant practice to the next level. The material was presented in a way that makes you feel comfortable going back to the office on Monday and getting started."

**Dr. Stephen Malki, GP - Oradell, NJ**

"Helped me realize that I can and should be doing soft tissue procedures in my office."

**Dr. Dennis Perry, OMS - Cincinnati, OH**
